

ASI 35

The ASI 35 is extremely flexible and easy to integrate into leak detection systems. Its components can be placed strategically to obtain the full leak detection benefits from the system : precise and repeatable results under any leak test conditions.

ASI 35 with control panel (cable length 5 m) , 5 m cable length to the Electronic module, Profibus communication

- Control panel with 5 m cable length
- 5 m cable length between the Vacuum module and the Electronic module
- Profibus communication
- Basic I/O interface (15 pins D-Sub)
- Restricted access to the settings menu to avoid any wrong manipulation while the system is in operation
- Universal voltage: no possible mistake whatever the country where the leak detection system is prepared and installed
- High helium pumping speed for optimized response time

The backing pump is not provided with the ASI 35
